The National Trust for Jersey brand guidelines

The National Trust for Jersey (National Trust Jersey) mission is to protect Jersey's natural beauty and historic places, for all, forever.

Our new logo, which includes the Jersey Elm Leaf as the marque, projects the values of our brand. It is contemporary, clean and flexible to enable us to apply it consistently across a range of media. We believe that like our previous branding, our new look is classical and will stand the test of time.

As the cornerstone of all our communication efforts, our brand guidelines must be followed carefully to ensure a consistent style and quality of presentation across all that we do from online communications through print to merchandise and signage.

The following pages present a clear and comprehensive set of guidelines for all to follow. If you encounter new branding challenges for which you require help with guidelines, please contact:

Sarah Hill
sarah@nationaltrust.je or phone Jersey 483193

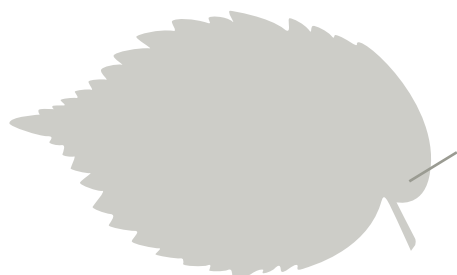

*You never get a second chance
to make a first impression.*

logo

*Our logo is the touchstone of our brand
and one of the most valuable assets.
We must ensure its proper usage.*

01

1. the logo and its usage 2. black, white and grey scale 3. logo construction + clearspace 4. minimum logo sizes and incorrect uses

logo and usage

Whilst the legal name of the Trust remains *The National Trust for Jersey*, our new logo comprises the following three elements:

- “National Trust Jersey” *logotype*
- Jersey Elm Leaf *marque*
- “Patron: HRH Prince of Wales” *optional*

The logo can either be used in a box, or free-floating.

When creating signage, a keyline border may be used around the box.

The logo

TWO COLOUR LOGO:
PANTONE 384 & 425

SINGLE COLOUR: PT425

Use lime green and white for logo on black or dark grey,
or reverse out logo in white from any colour from the palette

(FOR SIGNAGE ONLY)

National
Trust Jersey

HORIZONTAL LOGO (ONLY TO BE USED
WHEN HEIGHT SPACE DICTATES)

Boxed Logo

Free-floating logo Stencil logo

logo construction clearspace

The National Trust Jersey logo requires separation from the other elements around it. The space required on all sides is roughly equivalent to the cap height of the logo type 'x', and it must never be less than that.

To draw attention to our logo, avoid putting overwhelming or competing typography or graphics near the logo.

FREE FLOATING LOGO

BOXED LOGO

Whenever you use the logo, it should be surrounded with clearspace to ensure its visibility.

The horizontal logo is always free floating, never boxed.

MINIMUM LOGO SIZES

There are no predetermined sizes for The National Trust Jersey logo. Scale and proportion should be determined by the available space, function and visibility.

In print the minimum logo size is 34mm width, for the marque (the Jersey Elm leaf) it is 10mm width.

For screen, the minimum size that the logo can appear is 94px wide.

PRINT

34mm

SCREEN

94px

favicon

For digital uses the minimum size for the standard logo is 94px (wide or high). This is the smallest size apart from when using an ICO (favicon). This is the only instance where the elm leaf can be divorced from the logotype.

If there is not 94px in height available, use the horizontal version of the logo. The minimum height for the horizontal logo is 68px.

A link to download our logo files is available from Sarah – sarah@nationaltrust.je

the bitmapped type for the patron is too small for this size

24mm

68px

LOGO: INCORRECT USE

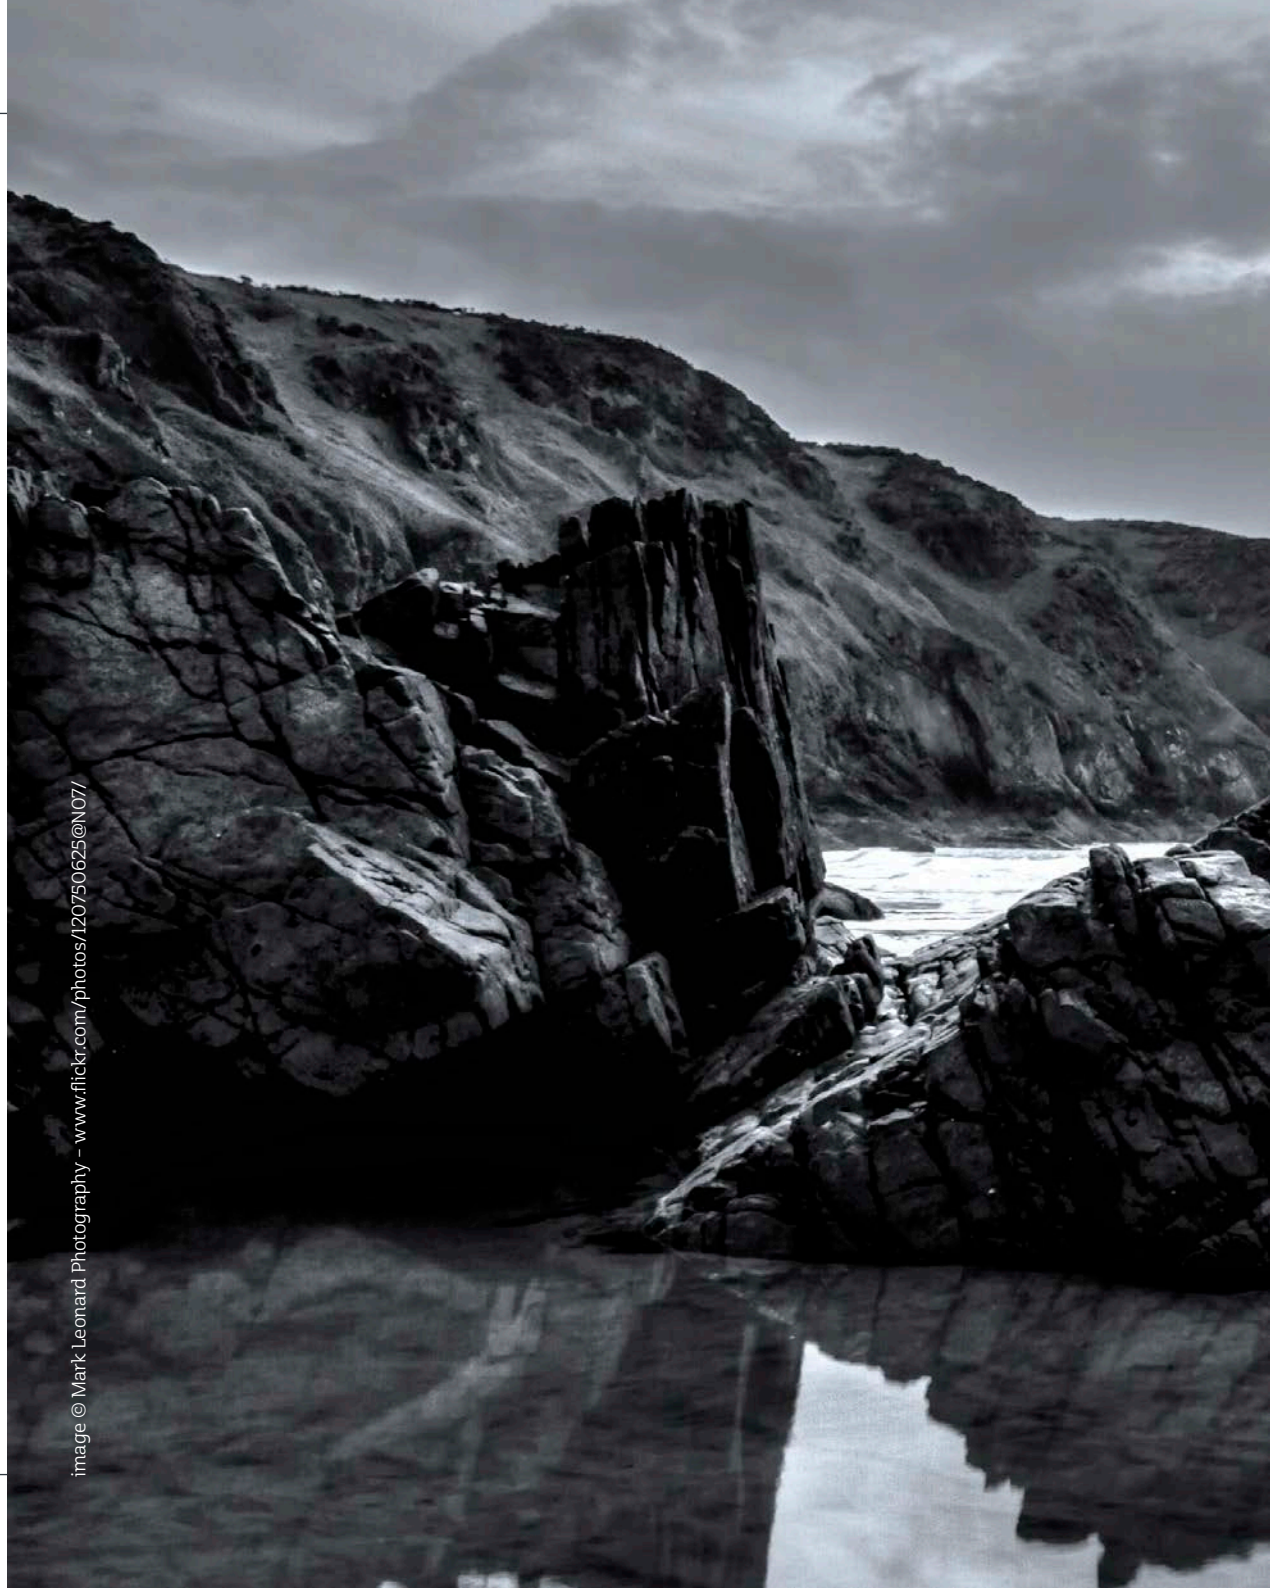

Please note: The logo cannot be changed! Although creativity is appreciated please do not alter the logo in any way!

Don't:

- rotate the logo
- stretch the logo
- add a drop shadow
- outline the logo
- rearrange elements
- add gradients
- use leaves without logotype
- use logo over an image
- make logo 3D (except for signage)
- use jpegs – for print the correct file format is vector .eps, and for screen use a .gif or .png

the typography

02

Cabrito Semi

DESIGNER: JEREMY DOOLEY 2015, PUBLISHER: INSIGNE

The 36 fonts of this well-crafted semi serif originate from the popular Cabrito, an Insigne design slab serif.

Our new branding incorporates the typeface Cabrito Semi.

Its handwriting-inspired feel is mellow and care-free, but its pure balance is its strength. Cabrito Semi's energy surges from deep within the relaxed, balanced tones of its humanist structure and calligraphic crafting.

Cabrito Semi is a purchased font, and it is not necessary to use it in everyday programmes such as email, Word or Powerpoint.

The following 18 styles have been chosen for National Trust Jersey.

This font should be used in all professionally produced communications, printed and online, to project a consistent visual identity. This includes promotional materials, advertising, digital assets, and printed materials.

typography and hierarchy

Size is the simplest way to create contrast between different typographic elements in your design. With three levels of typography, the font size generally starts out largest on top (level one; your most important information) and decreases in size as you move down the page.

Layout, for both print and screen, is one of the most important aspects of graphic design. Designs that extend across multiple pages or screens, whether containing large or small amounts of type, must be carefully controlled in a way that is enticing and is easy for all to access.

Keep text left-aligned, avoid hyphenation and full-justified text, avoid widows and orphans (single words at the beginning and end of a paragraph column). If you have a 2-letter or single-letter word at the end of a line – knock it onto the next line with a soft-return.

place text on image

Place text on images according to the examples on the right. It is important to place the text on solid colour parts of the background, or on a tint panel overlaid on top of the image with show-through. Don't use text on complex backgrounds, because it will reduce the readability.

Colours for text are white, dark grey,

lime green (PT389) and light blue (PT3125),

with headlines also using the darker colours

from our palette.

the brand colour palette

USE OF COLOUR FOR PRINTED AND DIGITAL MATERIAL

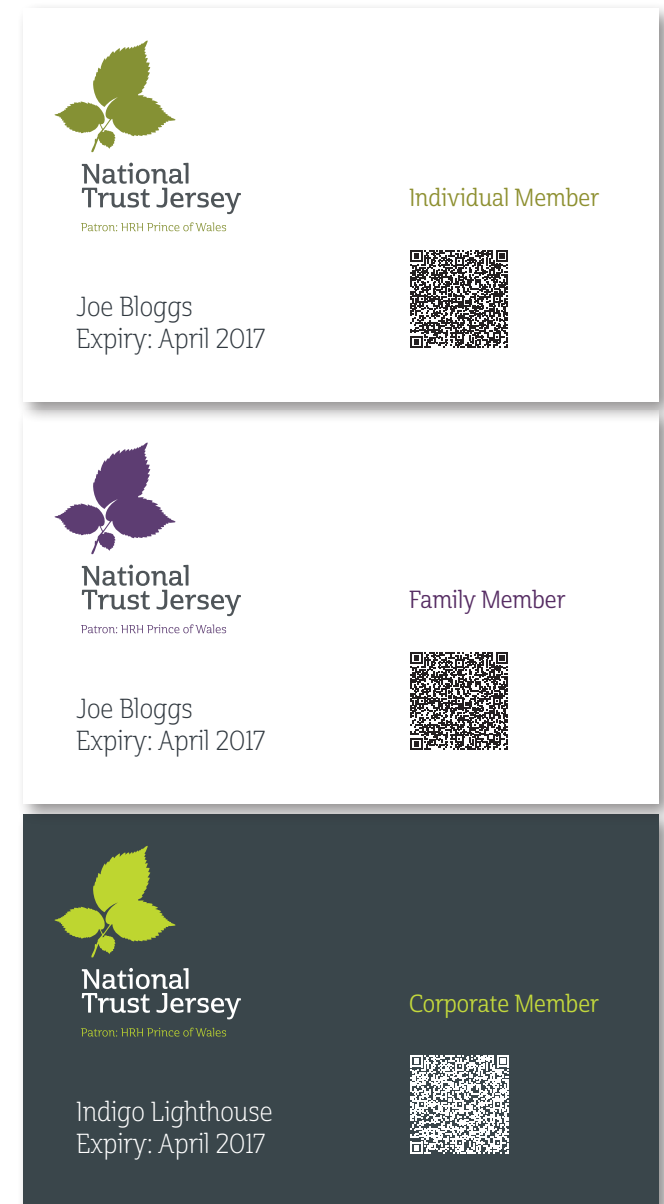

The following palette has been selected for use in The National Trust Jersey communications. Lighter tints of these colours are also allowed when the majority colour is solid. The Logotype and background may only be used with a 100% solid colour.

A comprehensive colour palette has been developed to provide flexibility whilst creating a unified, recognisable appearance across all communications. The majority of colour should be one of the three primary colours (100%) with a bright accent colour (lime green #cfdb00, orange #e55a00, pink #c72473, light blue #29adc8) to create a fresh and modern look.

the solid primary colours dominate, punctuated by a bright secondary accent colour.

Example use of colours on membership cards

signage

"Good writers are in the business of leaving signposts saying, Tour my world, see and feel it through my eyes; I am your guide." Larry King

1. signage 2. promotional supplies

04

signage

Our logo will appear in physical spaces and is an important way to direct visitors to our attractions. We strive to use sympathetic natural materials, such as stone and wood, to construct signage to our open spaces. We continue to use wrought iron signs for our properties, whilst also using modern materials for our facilities such as toilets, shops, cafés and offices.

- 1. Properties** Wooden Signage
- 2. Spaces** Sympathetic signs made of our natural material
- 3. Facilities** Modern signage

The stencil style logo can also be used where we use a stencil (paint stencil, cut vinyl or screen printed) or cut the logo out of a material sheet (e.g. steel, wood etc.).

Wooden signage for our properties,

sympathetic materials for our open spaces

modern signage materials for our facilities.

Buildings: Wooden Signage

Facilities: modern signage

stationery

*When it comes to developing stationery,
consistency is the key for all
layouts and designs*

1. the letterhead 2. business card, envelope and compliment slip

05

letterhead

Clean and simple, we designed our stationery to align with our visual system. The letterhead features the logo in the top left corner with the business contact information on at the bottom.

Using, and putting a recycled logo on our stationery emphasises our commitment to the environment in everything we do.

Print: black & PT384

Environmental Notes:

As well as being fully recyclable and biodegradable, Colourplan is FSC certified, meaning that it is made with, or contains, pulp from well-managed forests. It is also Heavy Metal Free and because the bleaching process avoids the use of harmful chlorine, it is classified ECF.

ENVELOPE, COMPLIMENT SLIP AND BUSINESS CARD

The two-colour double elm leaf can be used on merchandise as an allusion to the brand – but must not be used to replace the logo.

imagery

image © Mark Leonard Photography – www.flickr.com/photos/120750625@N07/

*Imagery is key to creating the overall
impression in supporters' minds*

1. the imagery & colour effects 2. examples and rules

06

imagery photography

Good imagery helps to reinforce our values. Photography must be professional in its approach and engaging in its content so that it has a distinct personality. Avoid clichés and obvious poses or angles.

Photography should express:

- **Atmosphere** – mix the character of images: dramatic and serene, and at different times of year – you don't always have to have summer shots, dramatic skies can evoke a yearning at any time of year. Contrast black & white with colour photography, overlaid with tints (as in this publication).
- **Beauty**
- **History (Historical Places & Natural Environment)**

The uniqueness of each photo will help to reiterate the independent spirit of our brand.

image © Mark Leonard Photography - www.flickr.com/photos/120750625@N07/

EXAMPLES AND RULES

REQUIREMENTS:

1. Use desaturated colours and black and white imagery overlaid with tints.
2. Colour photos should be crisp and strong, with accents of our colour palette.
3. Avoid standard shots – each photo should express character.
4. Use imagery that demonstrates creativity, nature or persons.
5. Use CMYK for print and RGB for screen and web.
6. Use greyscale images. When the colour scheme doesn't fit with the background you can overlay tints from our colour palette.
7. When using text over an image, use an overlay tint.
8. People shots should be diverse: a range of ages, with people always looking as if they are enjoying themselves. Avoid shots where the people are looking directly at the camera – they should be looking at the scene or view.

the grid system

*Using a grid system enables a level
of consistency that would otherwise
be extremely difficult to master*

1. print grid system 2. grid system for images 3. web template

07

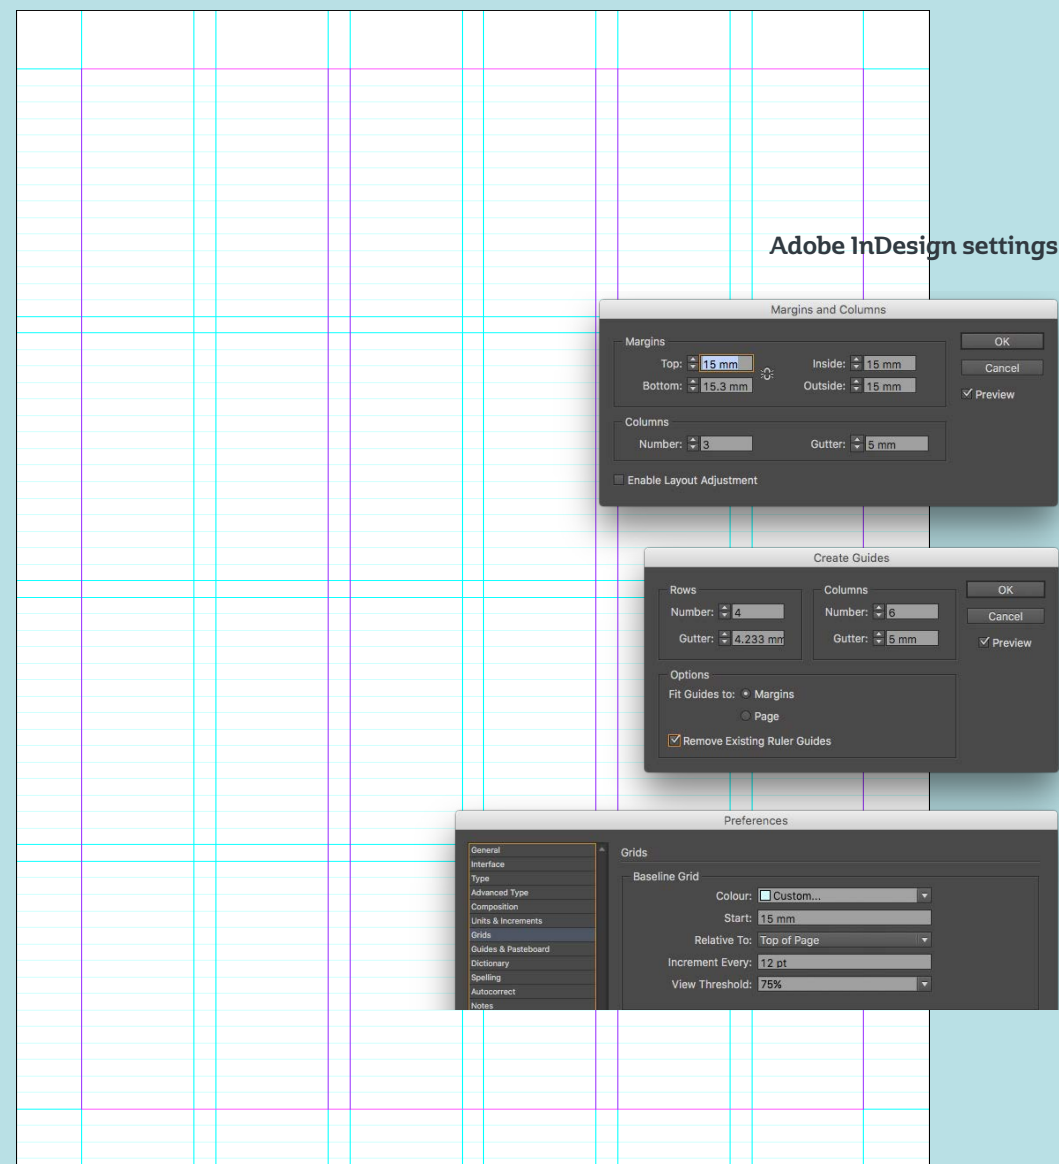

print grid systems

FOR USE ON A4

The grid is used as a guide for how to place the logo, text, photos on the page. The font size used should be proportionate to the grid. Using a font that is too large will cause odd hyphenation and breaks, which can be difficult to read, and using a typeface that is too small can cause strain on a reader trying to get from the start of a line to the end.

For A3 or A5, scale up or down the above grid.

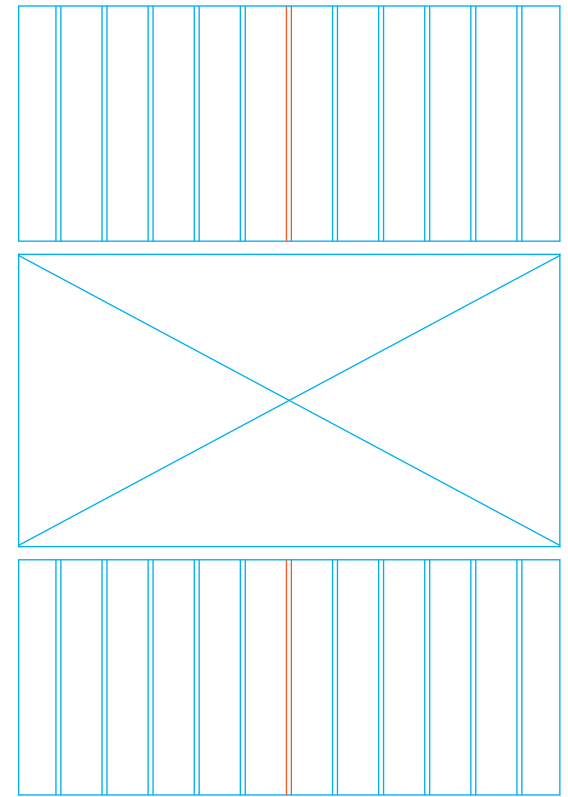

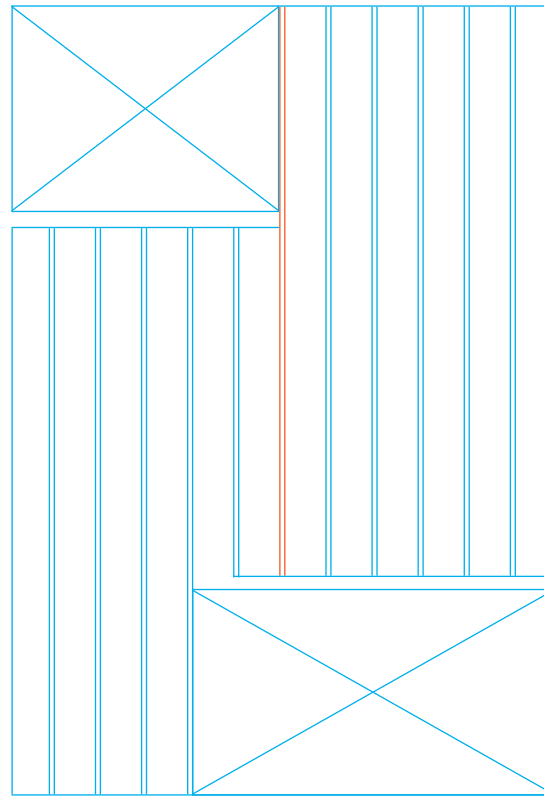

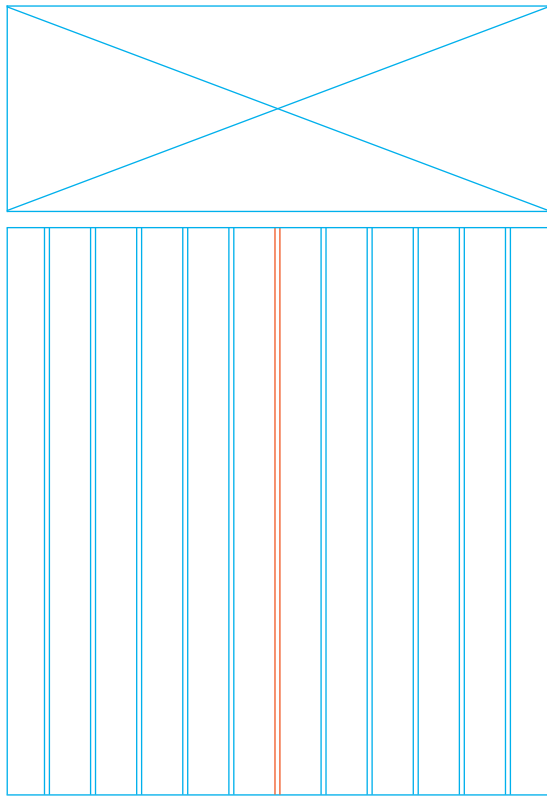

The 6 column grid is always the basic, for more complex layouts, use a 12-column grid.

Use 2, 3, 4, 6, 8, 10 or 12 columns for the layout

Body copy on this layout will be 9pt (size) on 12pt (line spacing) – for a portrait A4 document. Set the margins to 15mm (15.3mm for the bottom margin) and set a baseline grid to 12pt. Lock text to baseline, and align graphics and photos to grid.

GRID SYSTEMS FOR IMAGES

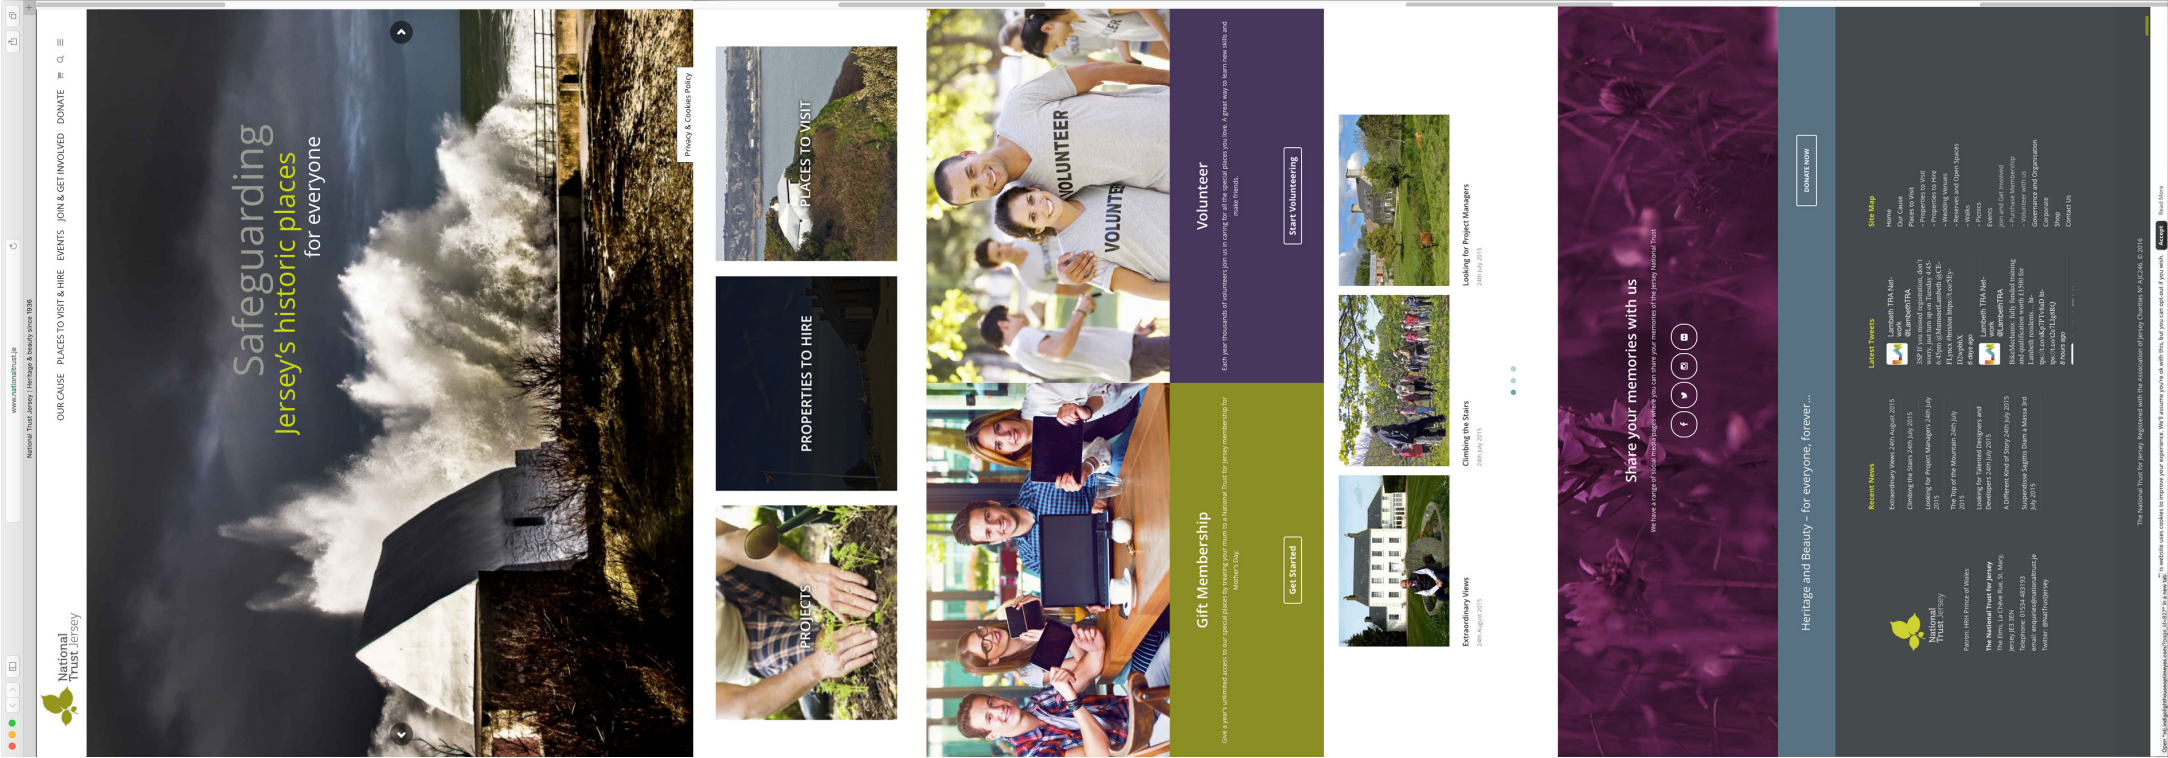

Website Theme

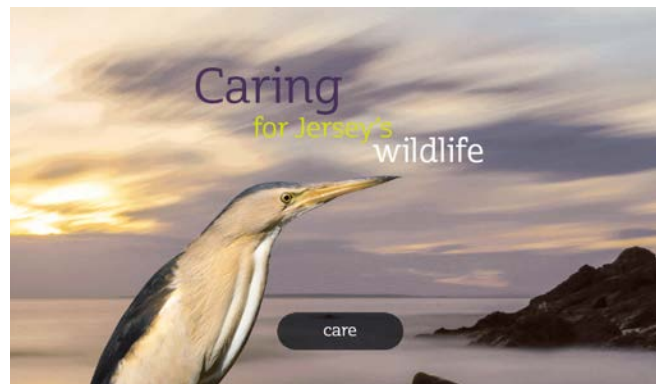

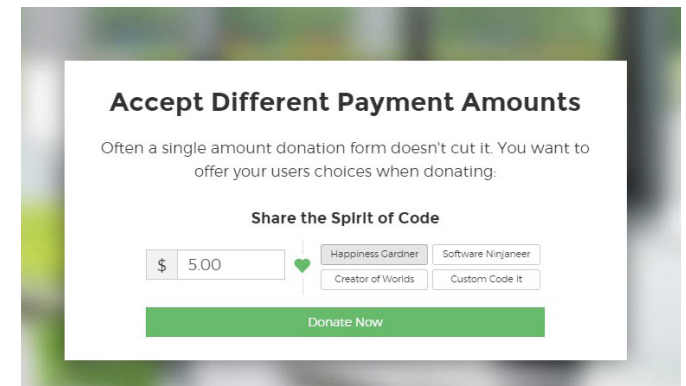

PREMIUM WORDPRESS THEME

We've used WordPress as the framework for our website. It's industry standard giving us maximum flexibility and options for keeping it up to date. It is also what the NTJ used previously, allowing us to archive their news items. There is lots of training and support available for WordPress.

The theme we've chosen is a professionally designed premium theme:
<http://themetrust.com/themes/create/>

The Donation functionality is controlled by a plugin called 'GIVE' – documentation and training videos can be viewed here: <https://givewp.com/documentation/core/give-101/>

The home screen uses the full version of the plugin Slider Revolution to rotate around the three signature images/themes.

promotional merchandise

When used on t-shirts, mugs etc. any of the approved logos can be used, but don't include the Patron line.

For the background, use our main colours, at least for primary functions to represent our brand.

OTHER SUPPLIES

For other office supplies use always the same colour, no matter what printable object you use.

Possible eco-friendly merchandise includes:

Tote and jute bags

KeepCups

Pens and Pencils

made out of recycled plastic cups

Seeds, seed sticks

leaflets with embedded seeds

checklist

Best to have a checklist. Then you know you've done everything perfectly!

01 THE LOGO

Only use approved versions of the logo. Please check that you have respected the minimum size and exclusion zone requirements. The logo should not appear on colour backgrounds without being reversed out.

02 COLOUR

Please make sure that only your approved primary and secondary colours are used.

03 TYPOGRAPHY

Use the font Cabrito Semi for professionally printed material.

04 IMAGERY

Photographs should be high quality and communicate atmosphere, historic places and the beauty of the natural environment.

Photography can be commissioned from Mark Leonard
